Greetings:

Washington
Department of
Transportation

The Aquatic Habitat Guidelines Program (AHG) is pleased to announce that hardcopies of the Integrated Streambank Protection Guidelines (ISPG) are now available. ISPG is an important contribution to the management of Washington State's stream corridors for protection and restoration of fish and wildlife habitat.

Engineers, Seattle
District Regulatory
Branch

The Aquatic Habitat Guidelines is a series of guidance documents being developed to facilitate marine and freshwater habitat protection and restoration through the consistent application of good science for design, construction, and operation of projects affecting aquatic systems. This series will provide guidance to lead entities, enhancement groups, local and state agencies, tribal governments, developers, planners, design engineers, landowners, and others. The guidelines are being prepared through the cooperation of the Washington State departments of Fish & Wildlife, Transportation, and Ecology, with grants provided by the Salmon Recovery Funding Board and the US Environmental Protection Agency.
